COURSE

*Providing hospital pharmacy services to patients
receiving advanced care in their own home*

1-2 February 2024 | **Stockholm** | **Sweden**

at Apotekarsocieteten (Swedish Pharmaceutical Society)
Wallingatan 26A, Stockholm

6th EAHP Synergy Certification Event

Providing hospital pharmacy services to patients receiving advanced care in their own home

Organizers: The Section of Hospital Pharmacy at the Swedish Pharmaceutical Society, the Hospital Pharmacy Section of The Finnish Pharmacists' Association, The Hospital Pharmacy Group of the Pharmaceutical Society of Iceland and Norwegian Association of Hospital Pharmacists

Introduction

The healthcare infrastructure is changing rapidly due to changes in demographics and workforce availability. Treatments that previously were only given in the in-patient setting is now being offered in the patient's own home. This shift from in-patient care to home care creates new possibilities and challenges for hospital pharmacy services. This change can be a daunting challenge in terms of adapting the provided services, but by using each other as inspiration and discussion partners we can further develop our services to benefit our patients.

The participation fee for the event is set to 2100 SEK.

Program

Day 1, Thursday February 1st 2024
